ramirezsherwint@gmail.com | Caloocan City, Philippines

PROFILE:

Information Technology graduate with experience in front-end development, UI/UX design, and multimedia production. Proven ability to design responsive web interfaces, develop user-centered prototypes using Figma, and collaborate with teams to transform requirements into functional digital solutions. Skilled in HTML, CSS, wireframing, and responsive design, with hands-on experience in web development and interactive system projects. Experienced in multimedia content creation, media asset management, and visual communication, enabling the delivery of engaging and intuitive user experiences.

TECHNICAL SKILLS:

- **Web Development:** HTML, CSS, PHP Laravel, MySQL
- **UI/UX Design:** Figma, Wireframing, Responsive Design, Prototyping
- **Multimedia Production:** Video Editing, Scriptwriting, Asset Management
- **Design & Productivity Tools:** Adobe Illustrator, PowerPoint, Canva, CapCut
- **Game Development:** Unity, C#

EXPERIENCE:

Multimedia Content Specialist & Media Manager

Systems Plus Computer College, Caloocan | 3 years | March 2022 – March 2025

- **Content & Script Development:** Developed story concepts and production scripts for school multimedia projects. Assisted in organizing creative direction and content flow.
- **Video Production:** Captured event footage for school programs and productions, managed media assets by organizing, renaming, and sorting production files, and maintained SD cards and storage systems for post-production workflow.
- **Cross-functional Collaboration:** Conducted interviews and coordinated closely with multimedia team members to ensure consistent messaging and high-quality event coverage.

Freelance UI/UX Designer & Web Developer

- **User-Centered Design:** Designed website wireframes and high-fidelity prototypes using Figma.
- **Content Structuring:** Collaborated closely with clients to translate complex project requirements into clearly structured digital content and intuitive interfaces.
- **Web Development:** Developed website features including inquiry-forms, admin-side pages, and mailer system components for the school website during OJT.

Freelance Game Developer

- Developed a 2D game using Unity and C#
- Implemented gameplay mechanics and UI elements for player interaction.
- Led testing and debugging of game functionality.

PROJECT:

- **AVONIC – Automated Vermicomposting with Live Web**
 - Designed the user interface and landing pages using Figma to optimize data readability and site navigation.
 - Created wireframes to establish clean visual hierarchies for complex environmental metrics.
 - Developed the overall content structure, navigation paths, and visual formatting for the platform.
- **Systems Plus Computer College – Caloocan Campus Website**
 - Designed responsive web page layouts using HTML and CSS.
 - Implemented and maintained functionality for the school mailer system.
 - Developed admin-side components and interface features to streamline content management.
- **Client Projects**
 - ClassGuard – Web based class attendance system with RFID backend integration.
 - Raccoon Dash Guardians Falls – A 2D fast-paced platformer game with run-and-gun action.

EDUCATION:

- **Systems Plus Computer College – Bachelor of Science in Information Technology**
Graduated: May 2026 | Awards: Rank 1 Overall
- **Manila Technical-Vocational and Entrepreneurial School – Computer Systems Servicing**
Graduated: July 2022 | Awards: With Honors

CERTIFICATIONS:

- Mastering Microsoft Excel – Microsoft Office Specialist (April 2024)
- Best Project Durability – Arduino Expo (December 2023)
- Rank 2 – Outstanding Project Handling and Most Notable Presentation – Arduino Expo (December 2023)
- Sustainability Innovator Award (2022 – 2023)
- Pillar of Leadership (2023 – 2025)
