### PROFESSIONAL SUMMARY

Front-End Developer and UI/UX Designer with experience in web development, Figma prototyping, and multimedia production. Skilled in HTML, CSS, PHP Laravel, MySQL, and responsive interface design. Experienced in collaborative academic and freelance projects, with a strong background in content creation, media management, and creative problem-solving.

### TECHNICAL SKILLS

**Front-End:** HTML, CSS

**Back-End:** PHP Laravel, MySQL

**UI/UX:** Figma, Wireframing

**Game Development:** Unity, C#

**Multimedia:** Adobe Illustrator, Canva, CapCut

### WORK EXPERIENCE

#### Multimedia Interviewer / Host

*Systems Plus Computer College | 2022 – 2023*

- Conducted on-camera interviews during school programs and competitions.
- Assisted the multimedia team in event coverage and production.

#### Multimedia Scriptwriter

*Systems Plus Computer College | 2023 – 2024*

- Developed story concepts and production scripts for school multimedia projects.
- Assisted in organizing creative direction and content flow.

#### Multimedia Videographer / Media Manager

*Systems Plus Computer College | 2024 – 2025*

- Captured event footage for school programs and productions.
- Managed media assets by organizing, renaming, and sorting production files.
- Maintained SD cards and storage systems for post-production workflow.

#### Freelance UI/UX Designer

*Self-Employed*

- Designed website wireframes and high-fidelity prototypes using Figma.
- Created responsive website layouts focused on usability and visual consistency.
- Collaborated with clients to translate requirements into interface designs.

#### Freelance Game Developer

*Self-Employed*

- Developed a 2D game using Unity and C#.
- Implemented gameplay mechanics and UI elements for player interaction.
- Led testing and debugging of game functionality.

### FEATURED PROJECTS

#### AVONIC – Automated Vermicomposting with Live Web

*Front-End Developer & UI/UX Designer*

- Designed the website interface and landing page using Figma.
- Created wireframes and high-fidelity UI prototypes.
- Developed content structure and visual layout for the platform.

- Collaborated with the team on system presentation and UI improvements.

### **Systems Plus Computer College – Caloocan Campus Website**

*Front-End Developer & UI/UX Designer*

- Analyzed existing school website to identify UI/UX improvements.
- Designed low-fidelity and high-fidelity prototypes using Figma.
- Developed responsive web pages using HTML and CSS.
- Built and maintained the school mailer's functionality.
- Assisted in developing admin-side components and interface features.
- Collaborated with the development team to improve website structure and usability.

### **Client Projects (ODDS)**

- ClassGuard — Web-based class attendance system with RFID backend integration.
- Raccoon Dash Guardians Falls — A 2D fast-paced platformer game with run-and-gun action.
